Next Steps & Timeline

Success Criteria

	Pain Point	Solution Goal	POC Success Indicator	ActivTrak Features
1	Leadership expressed need for objective data on remote work productivity to inform RTO policy decisions and validate employee claims of high WFH performance	Establish productivity baseline by location (office vs. remote) to support data-driven workspace policy	• Measure and compare productive hours by work location (office vs. remote)	Productivity by Location
2	IT leadership stated need to validate employee assertions of working extended hours and late nights, lacking objective verification tools	Quantify actual after-hours work patterns to verify overtime claims and identify potential burnout risks	• Track start/end times and actual working hours • Measure after-hours activity (nights/weekends) • Identify employees with extended work patterns	Daily Work Metrics Schedule Adherence
3	Current monitoring tools (Azure AD logs, other sources) provide fragmented visibility with significant blind spots in daily work activity	Demonstrate comprehensive activity visibility beyond authentication logs to understand actual work patterns	• Track productive vs. unproductive application usage • Identify top applications by time spent	Productivity Achievement

Success Criteria

	Pain Point	Solution Goal	POC Success Indicator	ActivTrak Features
4	New CIO facing pressure for cost cutting and cost savings, requiring objective data to identify efficiency opportunities	Identify capacity lift opportunities and productivity gaps to support cost reduction initiatives	• Measure productive hours against business goals • Identify low-utilization employees • Quantify capacity gap in FTE equivalent	Workforce Utilization & Financial Loss
5	IT leadership controls license management and seeks opportunities to reduce software spend through usage optimization	Identify unused or underutilized software licenses to generate immediate cost savings	• Track application usage patterns • Identify rarely-used licensed applications • Quantify potential license retirement savings	Top Applications & Website
6	IT leadership observed employees suspected of productivity issues including potential time theft and personal device usage during work hours	Detect anomalous activity patterns including potential mouse jiggler usage and verify work activity authenticity	• Demonstrate false activity detection capabilities • Identify suspicious activity patterns • Alert on potential time theft behaviors	Potential False Activity Alarms
4	Lack of visibility into meeting activity when there is no use of employee devices (ie, laptops)	Integrating Outlook Calendar will improve visibility into total meeting time by automatically recording calendar events that coincide with periods of digital inactivity	• Measure offline meeting time • Identify employees with excessive meeting load	Offline Meeting Time

ActivTrak POC Findings

Productivity by Location

Work Location	Productivity (Hours)
Remote Work	6.8
In-Office	6.5
Hybrid (Same Day Split)	6.4

Key Findings

- **Remote Work Advantage:** The pilot group was **0.3 hours more productive** working remotely compared to in-office.
- **Consistent Workday:** Working hours remain consistent regardless of location.
- **Department Variations:** The **Buying Apparel** team showed noticeably higher productivity when working remotely.
- **Hybrid Challenge:** Same-day location splitting resulted in the lowest productivity **(6.4 hours)**, suggesting a transition time impact.

Time Allocation Analysis

Team	Office Apps	Chat & Messaging	Business Systems	Other Categories
Buying Apparel	65.7%	14.1%	~10%	~10%
Finance	40.7%	5.7%	24.5%	29.1%
IT Department	15.4%	27.1%	4.5%	53%
People & Culture	33.1%	13.8%	9.2%	44%

Key Finding: IT Department spends 27.1% of time in Chat & Messaging - nearly double other departments - suggesting potential for focus time optimization.

Workforce Utilization & Financial Loss

Metric	Value
Users Below Productivity Goal	105 of 153 (68.6%)
Monthly Financial Loss	$104,292
Annualized Financial Impact	$1,251,500
Equivalent Untapped Capacity	25.03 FTE

Key Finding: The organization has the equivalent of 25 full-time employees worth of untapped productive capacity, representing a significant opportunity for efficiency gains without additional hiring.

Potential False Activity

3 Users Identified

Actively Using Input Simulation Tools

User	Detection Type	Method Identified	Verification & Validation	Status
Jay Bucoy	Confirmed Input Simulation	Input Simulation Alarm	**Executable Evidence:** The ActivTrak Agent identified the use of *movemouse.exe*	✓ **Confirmed**
Misha Virk	Confirmed Input Simulation	High Duration & Repetitive Activity alarms	**Screenshot Evidence:** Input simulation activity verified through captured screenshots	✓ **Confirmed**
Vijay Moorthy	Suspected Productivity Theater	Repetitive patterns of engagement and application use	**Activity Log Evidence**: Chronological analysis of logged activity indicates simulated engagement	⚠️ **Highly Suspected**

* Python-based input simulation scripts were successfully detected during testing by Efstratios

Key Recommendations

Immediate Actions (Quick Wins)

- **Focus on IT Department:** Address the **0.8-hour productivity gap** by optimizing meeting schedules, implementing protected focus time, and assessing workloads.
- **Target Bottom 24%:** Deliver intensive coaching to **36** users averaging fewer than 5 productive hours per day.
- **Address Input Simulation (Time Theft):** Investigate and mitigate cases of **artificial activity generation** (e.g., use of input simulators or "Productivity Theater") to ensure reported productivity reflects actual work output.

30-Day Initiatives

- **Chat & Messaging Optimization:** Evaluate whether time spent in chat tools reflects legitimate collaboration or potential input simulation (e.g., mouse jigglers). If validated, introduce dedicated focus time blocks for the IT team to reduce the current **27% messaging time**.
- **Hybrid Work Support:** Establish clear productivity expectations and best practices for the **6** recurring hybrid underperformers.
- **Manager Enablement:** Equip managers with dashboards and coaching resources to support teams where more than **50% of members fall below goal.**

90-Day Goals

- **Recover 25 FTE Hours of Capacity:** Achieve this through targeted productivity improvements and workflow adjustments.
- **Reach 7 Productive Hours for 80% of Workforce:** Up from the current **31%** meeting this benchmark.
- **Reduce Financial Loss:** Decrease from **$104K** to **under $50K per month** through improved performance efficiency.

Expected ROI & Business Impact

Projection Level	Annual Productivity Recovery	Capacity Gained Without Hiring
Conservative Projections (10% Improvement)	$125,150	2.5 FTE
Target Projections (20% Improvement)	$250,300	5 FTE
Full Potential (All Users at Goal)	**$1,251,500**	**25 FTE**

** These figures are calculated using a median salary of $50,000.*

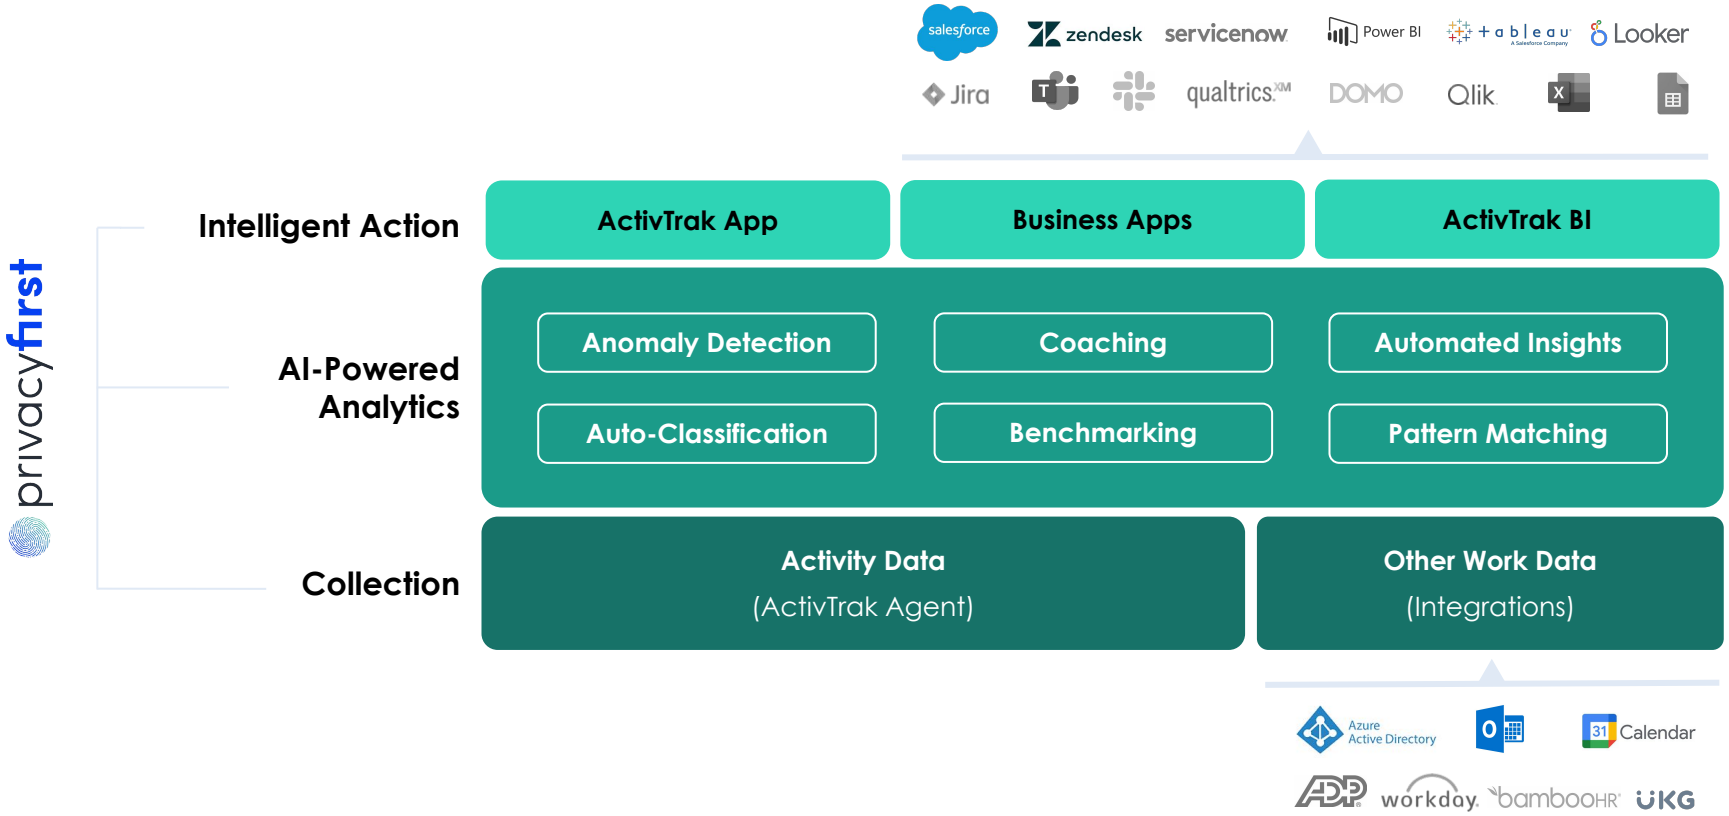
The Platform: How It Works



Solution Design & Recommendation

ActivTrak Platform

Employee Monitoring

Basic monitoring
for small companies

Essentials

- Automatic time tracking
- Time theft prevention
- Schedule adherence
- Real-time activity visibility
- Automatic alerts for non-compliant digital activities
- Offline meeting time via calendar integration

Enhanced monitoring
for mid-to-large orgs

Essentials Plus

Everything in Essentials, and…

- Work activity breakdown
- Productivity goal tracking & trend analysis
- Automated exception reports
- Report sharing with multiple stakeholders
- Full activity context through title bars & URLs (optional)

Productivity Management & Workforce Planning

Comprehensive solution to improve productivity & performance

Professional

Everything in Essentials Plus, and…

- Team management dashboard
- AI-powered coaching for managers
- Team engagement & workload balance
- Return-to-office policy adherence
- Productivity measurement by location
- Work efficiency analysis
- Focus & collaboration analysis
- Personal insights for employees
- Staffing & headcount planning analysis
- Technology usage analysis (including AI)

ActivTrak

ActivTrak Professional Services: Your End-To-End Partners in Workforce Optimization

Remote Administration

Ongoing managed services of your ActivTrak platform by our experts, ensuring you always have access to accurate, up-to-date productivity insights

- Ongoing account management

Data Services

Ideal for customers who need support configuring integrations with other business apps or setting up custom dashboards to view productivity data alongside other key business metrics.

- Custom implementations
- Integrations
- Custom dashboard configuration

Productivity Lab Services

In-depth analysis & strategic guidance to optimize your workforce productivity using ActivTrak advanced analytics capabilities

- Expert-led consulting programs
- Change management guidance
